

Maria Wilkister

I came to Cherylz when i was 11 years in grade five after i lost my parents.i have two siblings i being the firstborn who live with my grandmother in rural areas i visit them during holidays.i came to Cherylz through my aunt who introduced me to our late dad samuel sambuli.we had no electricity we used tin lamps and they were very smokey.there were only 4 buildings which were made of iron sheets that is the office,dining hall and kitchen,girls and boys dormitory which were very congested and rodents used to really disturb at night and we contracted diseases due to congestion.now a cube is shared by 4 people and its very spacious.we have a school starting from baby classes to grade 8.our library has all types of books to assist us in learning.kenya build has really transformed Cherylz into a rich mans home.i got my dad/sponsor through kenya build who is Basil Love when i was in form one secondary school and throughout the four years in high school i never lacked fees it was fully paid.

Am joining Cicely McDonnell school in Nairobi to pursue my diploma in nursing which takes 3 years.after my graduation i will go for my degree in nursing and al specialize in cancer treatment.my hopes is to become a professional nurse and help the needy and less priviledged in the society.My thanks goes to God,my loving late dad Samuel Sambuli,Basil Love and all the Kenya Build crew,God Bless you.
